To CISD Parents:

Synergy Imaging, LLC, a diagnostic ultrasound company is available to provide echocardiography services as a part of student athletic physicals. The echocardiogram is a pain free ultrasound exam of the heart that will take about 30 minutes.

Sudden cardiac death is rare in young athletes (about 1 in 200,000). One important cause of sudden cardiac death is Hypertrophic Cardiomyopathy which may be detected by an echocardiogram. Other conditions also cause sudden cardiac death and these may not be picked up by a routine echocardiogram. Please contact Dr. Tony Swaldi's office at 972-393-4726 to see if your child may benefit from an echocardiogram. All exams will be conducted at the office of Dr. Swaldi, 413 W. Bethel Rd. Ste 300, Coppell, TX 75019. The echocardiogram will be read by a certified cardiologist and all results will be made available to Dr. Swaldi. Appropriateness of screening for students will be determined on a case by case basis.

For more information please contact us at 214-202-4065.
